

Email Quarantine Automation

PRODUCT OVERVIEW

Email Quarantine Automation (EQA) completes Right-Hand's 360° approach to phishing scams, offering an automated and massive response to threats, straight on users' inboxes.

Admins can run queries to search for malicious emails that bypass perimeter defense technologies, and quarantine or delete phishing emails across all user inboxes from just a single click.

BENEFITS

- ✓ **O365 & G Suite Plug-in Integration:** Compatible with Microsoft O365 and G Suite to work directly on the organization's inboxes, offering an additional layer of defense.
- ✓ **360° Readiness Against Phishing Attacks:** Along with PhishArm with Phishing Readiness, Email Quarantine Automation is the one-stop shop for phishing prevention, detection, and response.
- ✓ **Quarantine Malicious Emails on Inboxes:** For all reported and confirmed malicious emails, quarantine those from all employee inboxes in bulk.

RIGHT-HAND'S 360° PHISHING PROTECTION BUNDLE

Prevent

Phishing Readiness

Create and distribute custom phishing simulations to influence user behavior to recognize real attacks.

Detect

PhishArm

Empower users to report phishing emails that bypass perimeter defense technologies and analyze if they're malicious.

Respond

EQA

Scan all user inboxes to quarantine or delete all malicious emails in bulk with a click of a button.

HOW EMAIL QUARANTINE AUTOMATION WORKS

Activate

A quick and easy enablement process gives you immediate access to EQA commands in the PhishArm inbox.

Investigate

Use PhishArm to perform an investigation on suspicious emails reported by users.

Respond

Tag emails as legitimate or malicious. If malicious, extract them from the user inbox, at the touch of a button.

Scale

Use automated rules to respond to similar malicious emails on all inboxes and take action in bulk.
