Credential Exposure **(0 Monthly Avg Alerts)**

Email Security **(0 Monthly Avg Alerts)**

Humans are Your First Line of Defense

Traditional security programs have been built on the premise that technology can prevent most malicious activity, or generate alerts in time for security staff to respond. While technology has improved, attackers have discovered and exploited a weakness in organizations that cannot be patched with technology: Your people.

Verizon's Data Breach Investigation Report (DBIR) tells us that human mistakes were a factor in 82% of data breaches. This may come in a variety of forms, from clicking on a malicious link in an email to divulging credentials via social engineering, to sharing unencrypted sensitive data.

Why Right-Hand ?

Automated
Automatically deliver the right training to the right people in the moment, to drive behavior change.

Engaging
Bite-sized learning draws users in using patent-pending gamification and individualized content.

Behavior Change
Empower your employees to detect attacks sooner, respond decisively, and change behavior.

A Single Platform to Prevent, Detect and Respond to Employee Security Incidents

Right-Hand's platform is the single solution you need to measure and reduce human risk to prevent employee-caused breaches.

Prevent

Security Awareness Training and Phishing Simulations teach users to see and stop threats at the very earliest stages, before they generate security alerts.

Detect

Phishing Reporting empowers your workforce to report suspicious and simulated emails easily through an O365 or Google Workspace integration.

Respond

Phishing Remediation helps find and eradicate true phishing emails that bypass email security solutions across all your corporate inboxes with a single click.

Don't settle for checking the box with security awareness training

	Right-Hand CYBERSECURITY	Legacy Platforms
Training Approach	Behavior-Based, Real-Time Training nudges based on employee behavior to fix bad cyber habits on the spot	One-Size-Fits-All, generic training
Pricing	Simplified, User-Based No additional fees for features, a straightforward price per user	Tiered, complex
Personalization	Automated, Fully Customizable All Training and phishing content is also aligned to your policies and culture.	Static training library
Employee Experience	Flexible and Automated Employees receive real-time training, while security teams fully automate programs.	Limited or even non-existent automation and user flexibility
Metrics	Human Risk Scores Full visibility of breach-prone employees, departments, groups, and organization	Standard click rate metrics, limited human risk visibility
