

# Training Readiness

## PRODUCT OVERVIEW

Training Readiness applies AI to recommend training to each individual employee based on their unique gaps in cybersecurity knowledge. Combining this with our gamification and micro-learning methods will help you increase employee engagement, knowledge retention, and accelerate behavior change.

## BENEFITS

- ✓ **Training Recommendation Engine:** Each employee receives a unique cybersecurity training module based on their knowledge gaps and behavior.
- ✓ **Mobile Friendly:** Portal administrators and employees have 24/7 access to their respective mobile-friendly training portals.
- ✓ **Micro-Learning:** Avoid user fatigue and increase general interest with our micro-learning approach that provides short bite-sized learning modules to increase employee knowledge retention.
- ✓ **Gamification:** Increase employee engagement and accelerate behavior change with leaderboards, points and rewards.

## PRODUCT FEATURES

### ★ Training Certificate

Upon completing each training module, each employee will receive a congratulatory certificate.

### 🔗 SCORM Compatibility

Export all training content into SCORM compatible files so it can be integrated and imported into your existing Learning Management System.

### 📁 Employee E-Learning Portal

Each employee will access a gamified learning portal to access training and interact with colleagues.

### 🎛️ Content Customization

All training content can be easily customized into various formats including Text, Images, GIFs, Videos, Audio, Multiple Choice Questions, or Boolean Questions.

### 📺 Extensive Library

Use our library of 100+ training modules with content about the most relevant cybersecurity topics.

### 📊 In-Depth Analytics

Access reports with results of each employee to track and assess their performance.

## HOW IT WORKS

### Create

Select or customize a training module and your target audience.

### Send

Schedule and send the training campaign with a click of a button.

### Train

Train your target audience to bridge the knowledge gap on the cyber essentials.

### Analyze

Monitor and run reports at any time for visibility into employee performance.

## CUSTOMER REFERENCE

**"We integrate Training Readiness together with Phishing Readiness, allowing for immediate employee risk mitigation while giving our security team visibility into employee behavior every step of the way."**

J.R. CISO, Enterprise SaaS Company

# Ally

## PRODUCT OVERVIEW

Ally is a gamified mobile app that delivers autonomous and adaptive employee training based on a user's knowledge gaps and individual risks.

If you're spending too much time, resources, or money on a security awareness program that underdelivers, Ally is the solution for you.

## BENEFITS

- ✓ **For the Business:** Quantify and reduce human risk to positively impact your business objectives. Ally preserves budgets and revenues and drives more informed security strategy decisions with actionable analytics.
- ✓ **For Security Teams:** Automate and personalize your human risk management program like never before. Easy onboarding, personalized content to your needs, extensive reporting, and learning that sticks will help security teams focus on what is important.
- ✓ **For Employees:** Ally offers a training approach that employees actually enjoy and lean into. Employees will enjoy the freedom to set their schedule and receive training nudges and personalized content in a fun and gamified way.

## THE SCIENCE BEHIND ALLY

### Adaptive learning

Ally's AI Engine learns from users' performance and delivers content tailored to their needs.

### Learning from anywhere

Ally offers engaging, bite-sized content in a device-agnostic experience.

### Real-world scenarios

Deliver real world scenarios that reflect daily habits and decisions.

### Gamification

Incorporate competitions, recognition and rewards to build a security culture.

### Spaced learning

Help your users beat the Forgetting Curve with just in time reinforcement.

### Automation

Automate everything, from onboarding to ongoing delivery in minutes.

## HOW ALLY WORKS

### Configuration

Configure Ally to meet your organization's requirements.

### Launch

Kickstart user enrollment, app downloads, and benchmark assessments.

### Analyse

Evaluate user performance and engagement in real-time.

### Adapt

Ally curates training content for each user based on past performance in real-time.

## CUSTOMER REFERENCE

**“It's the Duolingo for cyber awareness!”**
